                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 15, Application US/09144886

Patent No. US20020155114A1

GENERAL INFORMATION:

APPLICANT: Marks, James D

TITLE OF INVENTION: Therapeutic Monoclonal Antibodies That Neutralize

TITLE OF INVENTION: Botulinum Neurotoxins

FILE REFERENCE: 2500.1170A5

CURRENT APPLICATION NUMBER: US/09/144,886

CURRENT PILING DATE: 1998-08-31

NUMBER OF SEQ ID NOS: 98

SOFTWARE: PatentIn Ver. 2.0

SEQ ID NO 15

LENGTH: 23
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Gaps

Sequence 11, Application US/10184372

Publication No. US2030219852A1

GRNERAL INFORMATION:

APPLICANT: Bank, Rudolf A.

APPLICANT: Zurmond, Anne-Marie

APPLICANT: Te Koppele Johannes M.

TITLE OF INVENTION: Modification of collagenous materials and medical treatment, diagr
TITLE OF INVENTION: Modification of fibrotic conditions

FILE REFERENCE: P60187US00

CURRENT APPLICATION NUMBER: US/10/184,372

PRIOR APPLICATION NUMBER: US 09/450,209

PRIOR PERIOR FILING DATE: 1999-11-29

US-10-357-488-26

Sequence 26, Application US/10357488

Sequence 26, Application US/10357488

Sequence 26, Application WS/20030194730A1

GENERAL INFORMATION:
TITLE OF INVENTION: No. US20030194730A1cl FISSR-PCR primers and markers and a method
TITLE OF INVENTION: Parimers and markers for identifying genetic constitution and bre
TITLE OF INVENTION: varities.
FILE REFERENCE: 782-indian
CURRENT APPLICATION NUMBER: US/10/357,488

CURRENT FILING DATE: 2003-02-04

PRIOR APPLICATION NUMBER: 2606/MAS/2002

PRIOR APPLICATION NUMBER: 2606/MAS/2002

NUMBER OF SEQ ID NOS: 37

Sequence 154, Application US/10251117

Publication No. US2003070891A1

SEQUENCE INFORMATION:
Publication No. US2003070891A1

SERERAL INFORMATION:
PAPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: RIA Incerference Wedgated Inhibition of Epidermal Growth Factor Re;
ITILE OF INVENTION: Gene Expression Using Short Interfering RNA
FILE REFERENCE: 9004-042 (MBHB02-468-A)
CURRENT APPLICATION NUMBER: US 60/393,924

FRIOR APPLICATION NUMBER: US 10/163,552

FRIOR APPLICATION NUMBER: US 60/358,580

Publication No. US20030170891A1
GENERAL INFORMATION:
APPLICANT: Nibozyme Pharmaceuticals, Inc.
APPLICANT: McSwiggen, James
TITLE OF INVENTION: RNA Interference Mediated Inhibition of Epidermal Growth Factor Re
TITLE OF INVENTION: Gene Expression Using Short Interfering RNA
FILE REPERENCE: 900/042 (MBHR02-468A)
CURRENT APPLICATION NUMBER: US/10/251,117
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 1935, Application US/10665951
Publication No. US20040138163A1
GENERAL INFORMATION:
APPLICANT: Sirna Therapeutics, Inc.
APPLICANT: Beigelman, Leonid
APPLICANT: Pavco, Pamela
TITLE OF INVENTION: RNA Interference Mediated Inhibition of Vascular Endothelial
TITLE OF INVENTION: Growth Factor and Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Gene Expression Using Short Interfering Nucleic Acid (siNA)
FILE REFERENCE: 400/131 (MBHB02-742-F)
CURRENT APPLICATION NUMBER: US/10/665,951
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           OTHER INFORMATION: Description of Artificial Sequence: sinA antisense region
